

NO COST ENERGY RATE SAVINGS

Did you know that you can choose where your energy is being supplied from without switching utilities?

Electric and gas deregulation (also known as third party energy) allows customers to choose from competitively priced energy suppliers, different from their local utility, to provide electric and/or gas supply at a lower cost. The local utility still provides the delivery of the electricity and gas, so only the supply portion of your bill is affected.

Donnelly Energy can help lower your facility's energy supply rate at no-cost to you, potentially saving you thousands of dollars.

HOW IT WORKS:

- Donnelly Energy will complete a FREE analysis of your utility bills and facilitate offers from qualified third party energy suppliers.
- Donnelly Energy will present the best rate-saving opportunities available for your facility **
- Once you've selected the option that best suits you, you'll be presented with a proposal for that rate.
- About a week after the contract is signed you will receive one letter per account from your local utility company stating that a third party will be supplying your electric/gas. Savings from your new energy rate will immediately start going into effect! It's that simple.

Switching your energy supplier is completely free. All you have to do is sign.

****Please note though that for third party energy supply contracts, the specific opportunity that Donnelly Energy shares with you at the time of your meeting is only good until the close of business on the day of your meeting. This is because electric and gas are commodities, which are traded in the public markets on a daily basis and prices are continuously influenced by various market factors such as weather and politics.**

If you would like to move forward with an energy rate analysis through Donnelly Energy, please call 973-323-8008 or email marketing@donnellyenergy.com.

ENERGY RATE SAVINGS CASE STUDIES

ELECTRIC ANNUAL USAGE (KWH): 1,177,347

Fixed All-inclusive Supply Pricing *Taxes Included*

Term (Months)	Price (\$/kWh)	Estimated Savings (Term)
12	\$0.1017	\$86,299.54
24	\$0.0982	\$180,816.95
36	\$0.0974	\$274,05.06

ELECTRIC ANNUAL USAGE (KWH): 960,000

Fixed Supply Pricing *Taxes Included*

Term (Months)	Price (\$/kwh)	Estimated Savings (Term)
11	\$0.0819	\$5,856
23	\$0.0807	\$13,432
33	\$0.0806	\$19,272

GAS ANNUAL USAGE (DTH): 5,900

Fixed Supply Pricing *Taxes Included*

Term (Months)	Price (\$/Dth)	Estimated Savings (Term)
12	\$4.72	\$3,800
24	\$4.53	\$9,800
36	\$4.38	\$17,400

RATE SAVINGS PROCESS

To participate, please follow the steps listed below. The client will have an opportunity to review the savings in person before any changes are made (see Step #4 below.)

1. LEAD INTAKE

Provide Justin Avallone with interested clients contact information.

Javallone@donnellyenergy.com

W: 973-323-8008 x 109

C: 845-401-6253

Justin will then:

- Reach out and answer any questions they may have about the program.
- Obtain one year's worth of the clients electric and gas utility bills
- Confirm receipt of their submission.

2. ANALYSIS

Justin, in conjunction with National Energy Network, will complete the analysis and solicit offers from qualified third party electric suppliers.

3. PRESENTATION

Justin will then coordinate a meeting with the client to share the savings opportunity. Should they like to move forward with the program, he will work with you on presenting a contract for the client to sign.

Please note that the opportunity that Donnelly Energy shares at the time of the meeting is only good until the close of business on the day of your meeting. This is because electric and gas are commodities, which are traded in the public markets on a daily basis and prices are continuously influenced by various market factors such as weather and politics.

4. RATE CHANGE

About a week after the contract is signed the client will receive one letter per account from their local utility company stating that a third party will be supplying your electric/gas.

Once implemented, clients will save the percentage difference between the contracted rate with their third party provider when compared to the utility rate. The annual dollar savings is calculated based on your prior year usage, and actual dollar savings will vary based on total usage in the current year.

5. POST IMPLEMENTATION

Clients will also receive periodic savings analysis (on their preference of frequency) from Donnelly Energy and National Energy Network.
